FOLEY, ALABAMA

1926

Terms of Business

Location—Office and Nurseries at Foley, Baldwin County, Alabama, on the L. and N. Railroad.

INVITATIONS TO VISITORS.—We take pleasure in showing our stock to persons interested. If notified in time, we will meet visitors at the station on arrival.

APPLYING PRICES.—Five, fifty and five hundred trees of one class, at ten, hundred and thousand rates, respectively, purchaser's selection from varieties of one fruit having a common price. For instance, fifty or more peaches, in one or more varieties, would come at the hundred rate, and five hundred or more at the thousand rate. The foregoing does not apply to badly assorted orders, or to long lists made up of a few each of many varieties.

TERMS.—Cash with order, if for immediate shipment. Orders for trees to be held for some weeks after the shipping season opens should also be accompanied by full payment. On orders booked in advance of shipping season, 25 per cent. down, with the balance due when the shipping season opens. We do not care to ship C. O. D.

REMITTANCES.—To secure safety and prompt acceptance, remittances should be made by Bank Draft, Express or Post-Office Money Order, Registered Letter, Prepaid Express, or Certified Check.

METHOD OF SHIPMENT.—Shipping directions should be plainly written, and we urge our customers, in all cases, to use our order sheets. We shall be pleased to forward additional ones upon application. Kindly indicate whether shipment is to be made by freight, express or mail. When method of shipment is left to us, or when no directions are given, we will ship according to our best judgment, by such means as we believe to be in the best interests of our customers.

TRANSPORTATION AT PURCHASER'S RISK AND EXPENSE.—All transportation charges are to be paid by purchaser, and our responsibility ceases upon delivery to forwarding companies. Claims for losses or damages must be made upon the latter. We will, however, start a tracer for delayed shipments, if notified, and use every means at our command to secure prompt delivery, or recovery in case of damage or loss.

SHIPPING BY PARCEL POST.—In ordering trees or plants for shipment by Parcel Post, add 25 per cent to the list price, to cover cost of packing and postage.

TIME OF SHIPMENT.—Unless instructed otherwise, orders received during the shipping season will be forwarded as soon after their receipt as possible, and orders booked in advance will be shipped as soon as may be after the shipping season opens.

SHIPPING AND PLANTING SEASON.—November to March for all trees and shrubs grown in the open field. Balled and pot-grown plants may be shipped at any time. Shipments from March to November should go by express or post. Prices in this catalogue cover the shipping season of 1925 and 1926 ending first of May, 1926.

SELECTING VARIETIES.—Suited to locality is of the first importance, and can often be more advantageously done by ourselves than by purchaser. We are always glad to aid our customers in their selection, when so desired, and will, upon request, cheerfully furnish additional information in regard to the adaptability or desirability of particular varieties.

SUBSTITUTION.—It is our desire to furnish stock exactly as ordered. On orders for commercial planting, substitution of varieties will not be made without permission from customer. On small orders, items which we are unable to supply will be omitted unless we are instructed to substitute.

Printed Labels attached with brass wire to everything sent out.

WE GUARANTEE all stocks sent out to be well rooted, well grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guaranty is limited in amount to the original price received.

CLAIMS.—If, by any possibility, errors should occur they will be promptly rectified, if claim is made within five days after the receipt of the goods.

H. L. WINDBIGLER, Proprietor.

Roses

Roses should be planted extensively, as there is nothing that changes a house into a Home quicker than correct plantings of roses. In planning your beds, for best results it is well to confine your plantings largely to the varieties that bear an abundance of the largest and prettiest blossoms, full and double, and are strong vigorous growers, free from mildew and other diseases. Such a combination of good qualities can be found in the Kaiserin Augusta Victoria, Red Radiance, Pink Radiance, Virginia R. Coxe, Jeannette Heller, White Cochet, Pink Cochet and a few others. A solid bed of one variety will look prettier than any bed of mixed varieties.

Roses De Luxe at \$1.00 each.

Jeannette Heller. (T.). Grows anywhere, perfectly hardy, always in bloom, a beautiful blending of shell pink in the center, shading off to a rosy blush and pale yellow. Buds long, pointed and of immense size.

Los Angeles. (H. T.). Growth is very vigorous, and produces a continuous succession of long stemmed flowers of luminous flamed pink, toned with coral and shaded with translucent gold at the base of the petals.

Sunburst. (H. T.). One of the finest yellow roses, in color coppery yellow with

Kaiserin Augusta Victoria

Pink Killarney

golden orange in deeper shades. Immense buds, long and pointed on stout stems. A magnificent bush rose.

Souv. Claudius Pernet (Oern). The outstanding sensation in the rose world and

Los Angeles

hailed as the supreme yellow rose of the hour. Strong growing bush, magnificent foliage with perfectly formed flowers. Absolutely new; in color a deep lemon yellow without spot or blemish. Wonderfully free blooming and justly regarded as the most important introduction of this generation.

Mrs. Chas. Bell. (H. T.) A vigorous grower and extremely free bloomer. In color it is shell pink with salmon shading at the base of the petals—the most delicate of pink roses.

Madam Butterfly. (H.T.) A free bloomer, with beautiful buds of Indian ochre with yellow at the base and those intermediate tones of clear, brilliant shades of coral opening into double flowers.

Killarney Pink. (H.T.). A strong sturdy upright grower; the buds are exceedingly long and the flowers immense in size; color

Red Radiance

a deep brilliant, sparkling shell pink; a constant bloomer.

Killarney White. (H. T.). Identical with the Pink Killarney, of which it is an offspring, except in color, which is glistening white. Its greatness lies in the beauty of its buds.

Prices on the Standard Varieties, Budded and Grafted, Strong Field Grown:

Each 50 cts.; dozen, \$5.00.

Red Radiance. (T.). Vigorous grower, very heavy bloomer, fragrant, long stiff stems, one of the best roses for the South.

Pink Radiance. (T.). Same in growth and habit as the Red Radiance; in color it is a rosy carmine; reverse of petals beautiful silver tint.

Virginia R. Coxe. (T.). One of the reddest of roses, heavy bloomer and very fragrant.

Kaiserin Augusta Victoria. (H.T.). This is one of the most popular of the white roses, owing to its continuously blooming,

pointed buds; the large double flowers are glorious in their perfection.

Frau Karl Druschki. (H. P.). Sometimes called the White American Beauty. Buds fine and large, usually pure white, but sometimes with a slight shading of pink on the outer petals. The open flowers are of great size and the cluster of deep yellow stamens adds a touch of color at the center. A very strong growing rose.

Mrs. Chas. Bell

Pink Madam Cochet. (T.). Rosy pink, shading to silvery rose. A splendid rose of sturdy habits. Fine buds that last well cut; of large size and opening into full, double bloom of marked fragrance.

White Madam Cochet. (T.). Of the same habits, size of bloom and delicate fragrance as the Pink Cochet, but of pearly white shading to a most delicate pink that it is easily ranked as one of the few best roses.

Etoile De France. (H. T.). Lovely shade of clear, velvety crimson. Fine formed buds borne on strong stiff stems; good grower and a very heavy bloomer; one of the best; medium spreading growth.

Margaret Miller. (T.). Silver white, with delicate shaded center; vigorous grower, a profuse constant bloomer.

General Jacqueminot. (H. P.). A vigorous grower, producing flowers of brilliant crimson. This is a favorite.

No Home is complete without Climbing Roses to adorn the verandas.

Safrano. (T.). A strong growing rose, producing salmon colored buds of exquisite beauty; a good rose for southern plantings.

Climbing American Beauty. (H. C.). A strong, healthy, vigorous grower, frequently making shoots 10 to 12 feet long, good size flowers for a climber blooming so freely. Color a pleasing rose pink.

Reine Marie Henriette. (T.). It is one of the finest red climbers; the buds are cherry red, large and pointed, and the large open flowers are no less beautiful. A very fine growing rose.

Marechal Niel. (N.). The most famous and widely known rose grown in the South today. The flowers are a wonderful shade of clear deep yellow, and need no farther introduction.

Devoniensis. (T.). It is perhaps the strongest growing of the tea roses. The flowers, are white, delicately shaded pink. It is a favorite with all who know it.

Mary Wallace. (H. W.). A new rose with lovely long buds of a warm shade of pink peculiar to itself, very attractive, a rich green foliage that resists bugs, a distinctively American rose.

Strong Plants\$1.25

Strong Field Grown Bushes, 50 cts. each;
\$5.00 per dozen.

Satsuma Orange Grove

Satsuma Oranges

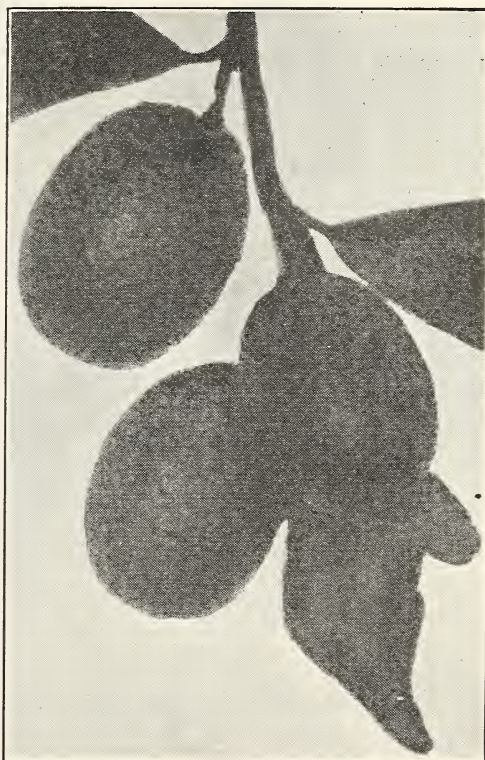

In planning your Satsuma grove, and looking in the future, do so with the same idea in mind as we did when we secured the bud-wood for our Satsuma trees. We went into the individual record of each grove tree, from which we cut the bud-wood. They had to be in good condition, and show a fine record for many years past of producing heavy crops of good fruit.

Every grove has its number of drones and weak trees caused by poor selection of bud-wood. In buying your trees, see the individual trees, from where the bud-wood was cut, examine in their past individual records. If you don't do so you are gambling with drones and weak trees. We invite you to examine into the record of our trees, so as to show you we are building for better Satsuma Groves. Make your future grove a planting of Perfection Brand Individual Tree Record Trees, and have no regret later on.

Prices of Individual Tree Record Satsuma Trees.

**Lemons**

Grapes

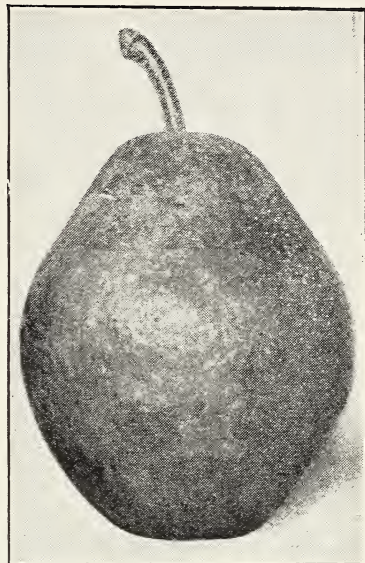

The planting of grapes here in the Southland has too long been neglected. Every home should have a selected planting of grapes—both of the commercial varieties, and those for the home use. Grapes is one of our fruits that brings returns on the investment in two and three years under proper care.

Varieties

Agawan, Worden, Ives, Diamond, Concord, Moore's Early, Niagara, Black Spanish, Thompson Seedless, Florida Malaga, Muscadine Grapes, Scuppernong, James and Thomas.

Agawan Grapes

Prices on Strong No. 1 Grade—
35c each; \$3.00 per 10; \$25 per 100.
Specimen plants, 50c each.

Call or write us for prices on Ellen Scott, Armalaga and Carmen.

Figs

Varieties: Brown Turkey, Lemon, Celeste and Brunswick.

Prices.	Each.	Per 10.

Pears

Pears are so easily grown that every home should have enough planted to supply their own table. We have a good grade of pears this year, and in the Douglas is a pear that makes a very fine eating pear. It is a very early bearer and a heavy one. The Pineapple (Chinese Sand) takes the place of the apple.

Varieties

Le Conte, Pineapple, Garber, Douglass, and Kieffer.

Prices.	Each.	Ten.	100.
